

Additional Information

I have put my hand up for council because I care deeply about the people, the places and the future of Bridgetown-Greenbushes. This is not just where we live, it's where we raise families, build friendships, support one another, and protect the area that makes our home unique.

Over the years I have been involved in local volunteering, wildlife rescue, and small business. These experiences have given me a strong connection to our community and an understanding of the every day challenges we face. I know what it feels like to juggle family, work, to run a business, and to put in the volunteer hours that help keep our town going. These perspectives will guide me to make decisions that are practical, fair, and community minded.

I believe our natural environment and our wildlife are treasures and worth protecting. At the same time, I want see our towns thrive, with opportunities for small business, tourism, and our shires people can flourish. I see a future where progress and conservation go hand in hand, and where the local voices are heard and respected in shaping that future.

As a councillor, I will always listen with an open mind, value respectful conversations, and be transparent about the decisions I make. My commitment is to bring positive energy and a willingness to work together so that our community continues to be a welcoming, resilient and vibrant place to live.

I am standing because I believe in Bridgetown-Greenbushes, in its people, its potential, and its spirit. With yours support I hope to serve in a way that strengthens what we love about our community and creates opportunities for the generations to come.
